

GP5 Peer Review Form

Group name: dr Reviewed by: chefs
(group being reviewed) (group writing the review)

- Have the team explain and demonstrate their new features to you.

Comments: Do the features seem interesting and useful for the intended users of the system? Are they working fully yet? Write your impression of these features below:

The features seem interesting and useful
to users of the web app

Some minor data display errors need to be fixed

Looks almost complete

- **Home Page**

Comments: Is the homepage complete? Is the functionality clear and oriented to prospective users (rather than listed by team member name)? Other comments?

The homepage looks complete and has clear
button/links to other pages

- **Have the team show you some of the code for a couple of the features.**

Comments: Are the uses of the database reasonably complex? Is the code clean and understandable? Other comments?

The code looks reasonably complex

The code looks clean and understandable

GP5 Self Evaluation Form

Group name: Team 2: Data Races (DR)

Self Assessment

- Have you pushed today's version to github?

Yes

- Briefly list the features you have created for your system.

- We added a task bar / home bar at the top of the website
- We added fancier colors and buttons to our pages
- We added pages for the users: Race organizers and Race crew
- Race event organizer can view and add races and shipments
- Race crew can select year and view races
- Kit shows the team kits and new team kits allows us to buy team
- We added a contact us and about page with images

- Did you need to change any of your data load/generate code during GP5? Did you revise any of the views you had created earlier? If yes, explain what changes you made and why?

• We made no changes to our data or code during GP5.

• We also didn't make any changes to the views

Reflection

After hearing the comments from your peers and the instructor(s), what areas in your system do you plan to revise during the next stage of development? **Please write your final task list and try to assign names to each task:**

- Workshop - edit
- Add a button to edit kits
- Select Year - Container contents
- View kit contents - change name to Container
- Add one pic, one par to Contact US
- Click on kit and take it over to another section
- Make sure the descriptions match the task
- Name view Container contents to Team Manager
- Add Nav bar to edit pages
- Race organizers - table fancy
